

AIRCRAFT WHEEL RACKS

AIRCRAFT WHEEL RACKS

Newark Wire Works manufactures, installs and guarantees our steel tubular aircraft wheel racks. They offer an unsurpassed level of safety, rigidity and strength. They can be made for any aircraft tire size from 3 – 6 tires per rack for commercial airline main gears and 4 – 9 tires per rack for commercial airline nose gears. Send us your available room size and we can custom design racks that fit your facility and maximize your available storage space.

OUR SERVICES

Newark Wire Works Inc. provides a turnkey service with customer satisfaction being our number one priority. From the first phone call to the last day of installation rest assured the project will be completed on time and done right the first time.

PRODUCT SPECIFICATION:

All welded construction with 2" square steel mechanical tubing with ½" X 2" steel flat bar front edge frame and ½" Ø wedge anchors to mount rack to floor slab.

EASY INSTALLATION

NO ASSEMBLY REQUIRED!!

FREE DESIGN

We provide free design assistance to maximize tire room capacity. Speak with one of sales representatives or distributors for more information.

INCREASE SAFETY

Protect employees and avoid workplace injuries by safely storing your inventory of aircraft wheel assemblies. Stop aircraft wheel assemblies from falling down in a domino effect from being stacked dangerously against each other.

INVENTORY CONTROL

Arrange and organize your aircraft wheel inventory for airline tire manifests.

PRODUCTIVITY

Less employees required to retrieve wheel assemblies because they are easily accessible.
