PROGUARD SERIES | WIRE MESH STORAGE LOCKERS

ProGuard Series wire mesh tenant storage lockers offer secure, individual storage solutions within shared spaces, making them an excellent choice for apartments, condos, and communal living environments. Engineered for lasting durability, these lockers feature a robust wire mesh design that provides superior visibility and air circulation, promoting a clean and organized storage experience. With their sleek, functional construction, ProGuard lockers ensure that stored items remain safe, accessible, and protected, making them a trusted solution for property managers and residents alike.

Standard Locker Configurations:

Single Tier -

A single-tier wire mesh locker features one full-length compartment, providing ample vertical space for storing tall items like uniforms or equipment. This design maximizes storage efficiency and accessibility within a compact footprint.

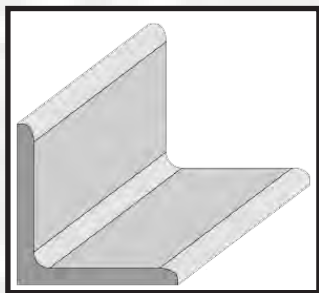

Double Tier -

A double-tier wire mesh locker is divided into two stacked compartments, offering separate storage spaces within the same vertical area. This design is ideal for maximizing storage capacity in limited spaces, allowing multiple users to store items securely.

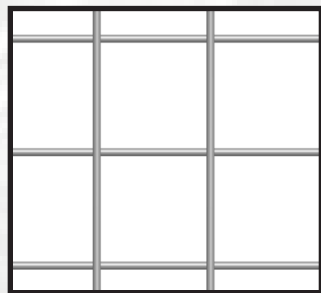

Custom sized widths / depths, and tiered locker options available
