

Wire Mesh Specifications:

6GA. 2" x 2" Square Welded Wire Mesh:

6 Gauge 2" Square Welded Wire Mesh is a heavy-duty carbon steel mesh made by resistance-welding each intersection for maximum strength and rigidity. The 2" square openings provide excellent visibility and airflow while maintaining superior durability. It's commonly used for security partitions, warehouse enclosures, tool cribs, and other industrial applications requiring a strong, reliable mesh.

In higher-security environments, the added wire thickness delivers increased resistance to impact and tampering. Its combination of strength, openness, and longevity makes it a go-to choice for facilities that need dependable protection without sacrificing visibility.

Category	Specification
Mesh Type	2" x 2" Square Welded Wire Mesh
Wire Gauge	6 Gauge
Wire Diameter	0.192" (approx.)
Material	Carbon Steel
Manufacturing Method	Resistance-welded at each intersection
Typical Finish Options	Mill Finish, Powder Coat, Hot-Dip Galvanized (HDG), Painted
Sheet/Panel Compatibility	Compatible with ProGuard angle-frame system
Weight (approx.)	~3.0 – 3.5 lbs/sq ft
Common Panel Sizes	36", 48", 60", 96" widths (standard NWW panel sizes)
Open Area	~75%
Tensile Strength	Medium-High
Use Cases	High-security partitions, warehouse cages, tool cribs, aerospace/DoD, heavy-duty industrial applications
